

VIBRO/DYNAMICS

technologically advanced machinery mounting systems

Hy/Tuned™ Spring Isolators

SVX, SVS & SMS

Viscous & Material Damped
Spring Mounts

Vibro/Dynamics Hy/Tuned™ Spring Isolators are a series of modular spring isolators designed to solve the toughest vibration and shock transmission problems.

Their low natural frequency design makes them the ideal solution for solving vibration and shock problems associated with large stamping presses. These isolators are designed to effectively isolate impact forces up to 99%.

Vibro/Dynamics Hy/Tuned™ Isolators also effectively protect sensitive machinery and building structures from incoming vibration and shock.

We specialize in custom designs and application engineering.

Hy/Tuned™ Spring Isolators

SVX, SVS, & SMS Series Features and Benefits

Model SVX6009

Model SVS3308

Extra Vibration Protection and Proper Support

Unlike conventional spring mounts, Hy/Tuned Spring Isolators come equipped with a high-quality resilient cushion that provides a uniform contact surface between the isolator and the floor. This cushion also isolates high-frequency vibration caused by coil spring resonance.

Damping Systems

Selecting the proper damping system is essential for controlling machine motion. SMS Isolators feature a material damping system, while SVX and SVS Isolators have viscous damping systems. SVX has a totally enclosed spring and damper design.

Viscous damping is best suited for presses that have a high degree of unbalanced inertia force. This type of damping is also desirable for presses that generate high forces during clutching and braking.

Material damping is best suited for presses with moderate vertical and horizontal inertia forces. Also, material damped isolators are desirable for installations that have isolator space constraints since their design is more compact than viscous damped isolators.

Custom Design and Engineering

Vibro/Dynamics will work with your design team to design and build a spring isolator to suit your particular need.

We have numerous damper types and can offer pre-compressed and non-compressed designs.

Built Tough To Last

Vibro/Dynamics combines its low-stress isolator design philosophy with high-quality materials to ensure the longest effective isolator life. Our isolators are built to last even under the most severe operating conditions.

Technical Assistance

To assure the best installation, our application engineers will carefully analyze your particular application needs and recommend the proper isolator for the best installation. Please give us a call, and we will be happy to assist you in your selection.
